Jeff, combining the lab results with the trip report is OK with me. Let me know if you think the delivery date will slip beyond next week.

Dan,

I have the soil data, but we should be receiving the fish tissue results later this week. I was holding off submitting the trip report so I could just include the data with that report. Does that sound ok, or do you want me to go ahead and forward along. The trip report just summarizes site activities and samples collected, there is no data evaluation. If we wait, I would think we would all by next week sometime.

Jeff, what's the status of the samples/data you collected at MEW for the FYR sampling event?

Thanks,
